

**JONATHAN S. DORDICK, PH.D.**

**Howard P. Isermann Professor of Chemical and Biological Engineering, Biomedical Engineering, and Biological Sciences  
Rensselaer Polytechnic Institute**

Office Address: Center for Biotechnology & Interdisciplinary Studies  
4005 CBIS  
Rensselaer Polytechnic Institute  
Troy, NY 12180

Telephone: Office: (518) 276-2899

E-Mail: dordick@rpi.edu

**Education**

Ph.D. Massachusetts Institute of Technology  
1986 Biochemical Engineering

M.S. Massachusetts Institute of Technology  
1983 Biochemical Engineering

B.A. Brandeis University  
1980 Biochemistry and Chemistry

**Professional Experience**

Howard P. Isermann Professor, Department of Chemical and Biological Engineering, Rensselaer Polytechnic Institute, Troy, NY, 1998-present.

Vice President for Research, Rensselaer Polytechnic Institute, Troy, NY, 2012-2018.

Guest Faculty Investigator (Visiting Professor), Rockefeller University, New York, NY, 2016-present.

Adjunct Professor, Icahn School of Medicine at Mount Sinai, New York, NY, 2014-present

Director, Center for Biotechnology & Interdisciplinary Studies, Rensselaer Polytechnic Institute, Troy, NY, 2008-2012.

Joint Appointments in Departments of Biomedical Engineering and Biological Sciences

Visiting Research Scientist, Wadsworth Center, New York State Department of Health, 2007-2013.

Chairman, Department of Chemical and Biological Engineering, Rensselaer Polytechnic Institute, Troy, NY, 1998-2002.

Professor and Chairman, Department of Chemical and Biochemical Engineering, University of Iowa, Iowa City, IA, 1995-1998. Joint appointment in the Department of Medicinal and Natural Products Chemistry, College of Pharmacy, University of Iowa, Iowa City, IA, 1996-1998.

Professor, Department of Chemical and Biochemical Engineering, University of Iowa, Iowa City, IA, 1994-1995.

Associate Director, Center for Biocatalysis and Bioprocessing, University of Iowa, Iowa City, IA, 1990-1998.

Associate Professor, Department of Chemical and Biochemical Engineering, University of Iowa, Iowa City, IA, 1991-1994.

Assistant Professor, Department of Chemical and Biochemical Engineering, University of Iowa, Iowa City, IA, 1987-1991.

Postdoctoral Research Fellow, Tate & Lyle Group Research and Development, Reading, U.K., 1986-1987

### **Accomplishments as Vice President for Research**

As VP for Research, and serving as a member of the President's Cabinet, I played a major role in shaping (and indeed co-authoring) the new *Rensselaer Plan*, which serves as the core strategic plan that lays out the university's vision in research, education, student life, and our global communities through 2024, the 200<sup>th</sup> anniversary of Rensselaer. I oversaw a research enterprise of over \$100M in sponsored and related research expenditures, the majority of which derives from federal programs and increasingly industry. Approximately 65% of these funds run through ten Institute-wide centers and five broad Research Institutes, which reported to me and that impact both cutting edge research and pedagogy. I initiated large-scale research institutes and platforms, established new partnerships that built capabilities in both research and education, and spearheaded several key transformational programs, all of which increased Rensselaer research capacity and opened up new opportunities for students at all levels. These accomplishments are detailed below.

- **Cognitive and Immersive Systems Laboratory (CISL).** Through a \$40M project funded by a public-private partnership, the CISL is a unique multimodal center that marries cutting-edge cognitive computing systems (e.g., next-generation machine learning, language understanding, and artificial intelligence) with human-scale immersive environments (e.g., sensor- and actuator-equipped rooms that both register sounds and gestures, and produce complex audio and video). The CISL allows users to collaborate, make better decisions, and enhance intellectual outcomes in business, design, medical diagnoses, and pedagogy. Importantly, the CISL provides a pathway for faculty and students in the humanities, arts, cognitive sciences, and economics to enhance their research experience and drive collaborations with researchers in our Schools of Engineering and Science. I served as the founding Principal Investigator of the CISL.
- **The Rensselaer Institute for Data Exploration and Applications (IDEA).** Through broad investment of approx. \$100M, I initiated IDEA, which brings together computational, physical, biological and social scientists and engineers to address important human, social, cultural, financial, and scientific/engineering data and inform emergent hypotheses. Together with our Center for Computational Innovations (CCI), which houses the most powerful private university supercomputer in the U.S., IDEA is having an immediate impact in diverse areas ranging from cybersecurity to human health. Most recently, I worked with the IDEA director to establish a new cognitive healthcare initiative, which received over \$20M in industrial and federal funding.
- **Center for Materials, Devices, and Integrated Systems (cMDIS).** Building off our NSF-Nanoscale Science and Engineering Center, and our Center for Integrated

Electronics, the cMDIS bridges physics, materials science, and biology with engineering to develop a fundamental understanding of phenomena critical in developing new nano- and microscale devices, and impacting the built environment, energy capture, storage and transmission, and enhanced computational power. The cMDIS has grown to over 80 faculty across all five schools at Rensselaer and well over 200 Ph.D. students.

- **Knowledge and Innovation Program (KIP).** I aggregated a wide range of university resources to develop this research seed program that provides large (>\$100K awards) to multidisciplinary research teams. A critical aspect of the KIP is the need to include socioeconomic aspects directly related to a scientific and/or technological research focus. This was done by requiring a faculty co-PI from our Lally School of Management or our School of Humanities, Arts and Social Sciences. Now in its third year, the KIP has resulted in funded awards from NSF, NIH, NEH, DARPA, and other federal agencies totaling over \$10M to date from a Rensselaer investment of approx. \$1M.
- **Affiliation with the Icahn School of Medicine at Mount Sinai.** I established the first Rensselaer partnership with a major research-focused medical school, which through a broad affiliate agreement, enables Rensselaer and Mount Sinai faculty to work closely together to translate clinical challenges into products and processes to benefit medicine. Our affiliation bridges research and education, the latter providing our undergraduate students with a direct path into a top-ranked medical school through the Sinai FlexMed program. The relationship has grown into joint faculty appointments, shared core facilities and other resources, joint courses at the graduate level (and for Rensselaer at both the graduate and senior undergraduate levels), and multiple joint large-scale NIH grants.
- **International Partnerships.** I spearheaded research, educational, and student programs and partnerships with several major international universities, including: the Instituto Superior Técnico (Lisbon, Portugal) in regenerative medicine and including a joint Ph.D. program with support from the Portuguese government; a campus-wide collaboration with the Korea Advanced Institute of Science and Technology (KAIST); and most recently a broad partnership with the Indian Institute of Technology-Bombay in areas ranging from biotechnology to data analytics. These partnerships are in addition to advancing the myriad existing partnerships with undergraduate and graduate programs in Europe, Latin America, Asia and Africa.
- **Applied Research Institute (ARI).** I developed the ARI as a critical and growing part of the Rensselaer research ecosystem that serves as a natural transition from basic research on the Troy campus to commercialization through new venture formation or partnerships/collaborations with existing companies. Housed at our Technology Park Campus, the ARI enables faculty, research scientists, postdocs, and graduate and undergraduate students/interns to work on problems that impact society in fields ranging from healthcare to energy, and high-performance computing to cognitive computing. As part of the ARI, I organized and facilitated the involvement of Rensselaer in several U.S. manufacturing institutes in clean energy, robotics, and biomanufacturing, where Rensselaer serves as tier one partner.

In all of these programs and partnerships, I have been fortunate to lead a group of dedicated, imaginative, and collaborative researchers (center directors, faculty, research scientists, postdocs and students at all levels) and have been able to inspire them to focus on a vision for what is possible, while the Office of Research sought out enabling support.

### **Accomplishments as Director of the Center for Biotechnology & Interdisciplinary Studies (CBIS)**

While serving as director, the CBIS matured both operationally and intellectually, and underwent rapid growth in research funding, personnel, and impact. The CBIS now serves as the model organization within Rensselaer by providing a vibrant research program while maximizing the societal impact of Rensselaer's substantial investment in infrastructure and people. The CBIS provides necessary financial and operational resources for nearly 40 faculty, which enables them to develop or expand their research horizons. Under my leadership, the CBIS focused on core strengths at the interface of life sciences, physical and computational sciences, and engineering. The CBIS now plays a major role in defining international research directions in global health, biomanufacturing, and functional materials. This intellectual growth resulted in a doubling in the CBIS external funding under my leadership along with concomitant rise in the rankings of our departments of chemical and biological engineering, and biomedical engineering.

### **Accomplishments as Department Chairman**

I served as Chairman of the Department of Chemical and Biochemical Engineering at the University of Iowa (1995-1998) and Chemical Engineering at Rensselaer (1998-2002). As department chairman of what is now Chemical and Biological Engineering at Rensselaer, I oversaw a fundamental transformation of the department into a collaborative, highly research active, and impactful program. I led the hiring of five faculty, including two current leaders at Rensselaer, a repositioning of the department to embrace biomolecular science and engineering, and successful ABET accreditation.

### **National Service and Committees**

I have sharpened additional leadership skills by serving as the Chairman of the Biochemical Technology Division of the American Chemical Society and through appointment to numerous editorial and leadership boards. This includes serving as a member of a Working Group for the U.S. Council on Competitiveness and a member of an advisory panel for PCAST (President's Council of Advisors for Science and Technology) and a member of the Advanced Manufacturing Partnership (AMP2.0) team that also advised the White House.

### **Honors, Awards, and Lectureships**

- 2019 Amgen Biochemical Engineering Award
- 2016 Robert Pigford Memorial Lecture, University of Delaware
- 2015 Food, Pharmaceutical and Bioengineering Award, American Institute of Chemical Engineers
- 2015 Elected to the National Academy of Inventors
- 2011 Inaugural Mylan Lecture, University of West Virginia
- 2011 Merck Lecture, University of Virginia
- 2010 Elected Fellow, American Chemical Society
- 2009 Outstanding Scientific Achievement Award, Defense Threat Reduction Agency
- 2007 Marvin J. Johnson Award, American Chemical Society Division of Biochemical Technology

- 2007 Elmer Gaden Award, John Wiley & Sons and American Chemical Society Division of Biochemical Technology
- 2007 Trustees Lecture, Rensselaer Polytechnic Institute
- 2007 School of Engineering Research Award, Rensselaer Polytechnic Institute
- 2004 Elected Fellow, American Association for the Advancement of Science
- 2003 International Enzyme Engineering Award
- 2003 School of Engineering Research Award, Rensselaer Polytechnic Institute
- 2000 Alan Berman Research Publications Award, U.S. Department of Defense
- 1998 Howard P. Isermann Professorship, Department of Chemical Engineering, Rensselaer Polytechnic Institute
- 1998 American Chemical Society Iowa Section Award
- 1998 Who's Who in America
- 1997 Trapp Lecture in Biotechnology, Departments of Chemistry and Food Science and Engineering, Iowa State University
- 1996 Elected Fellow, American Institute of Medical and Biological Engineers
- 1996 Who's who in Science and Engineering
- 1993 Leo Rettger Society Lecturer, American Society of Microbiology, Connecticut Chapter
- 1992 Chairman, Division of Biochemical Technology, American Chemical Society
- 1991 Observer for National Academy of Sciences for IUPAC Meeting in Hamburg
- 1991 U.S. Delegate for U.S. - Korea Joint Seminar on Bioprocess Technology, Seoul
- 1989 Presidential Young Investigator Award, National Science Foundation
- 1989 Faculty Scholars Award, University of Iowa
- 1989 NASA Technical Innovation Brief
- 1988 Old Gold Summer Faculty Fellowship, University of Iowa
- 1983 Interlox Predoctoral Fellowship, MIT

### **Plenary and Keynote Addresses**

- 2016 Plenary Address for Korean Society of Biotechnology and Bioengineering, Gyeong-Ju, Korea
- 2014 Plenary Address for DECHEMA Annual Meeting, Aachen, Germany
- 2012 Keynote Opening Lecture, Biocat2012, Hamburg, Germany
- 2011 Plenary Address for the BioTrans Meeting, Giardina Naxos, Sicily, Italy
- 2010 Plenary Address for the AIChE National Meeting, Division 22, Salt Lake City, UT
- 2007 Keynote Address for the 12<sup>th</sup> Mexican Biotechnology and Bioengineering Conference, Morelia, Mexico
- 2006 Plenary Address for the Eastern Mediterranean Chemical Engineering Conference, Dead Sea, Israel
- 2005 Plenary Address for Enzyme Engineering XVIII, Geong-Ju, Korea
- 2005 Plenary Address for Biochemical Engineering XIV, Harrison Hot Springs, BC
- 2004 Plenary Address for the American Institute of Chemical Engineers, Austin, TX
- 2001 Plenary Address for the 6<sup>th</sup> Biochemical Engineering Conference, Taipei, Taiwan
- 1998 Plenary Address for Division 15 for the American Institute of Chemical Engineers, Miami, FL
- 1996 Plenary Address for the Division of Polymer and Materials Science and Engineering, ACS, New Orleans, LA
- 1995 Keynote Address for the Colorcon Symposium on Controlled Release, Princeton, NJ

- 1995 Keynote Address for the Carbohydrate Bioengineering Meeting, Helsingor, Denmark
- 1994 Plenary Address for the 4th International Workshop on Oligo- and Polysaccharides, Aussois, France
- 1994 Plenary Address for the Biodegradable Polymers Symposium, Boston, MA.
- 1993 Plenary Address for the International Congress on Chemicals from Biotechnology, Hannover, Germany.
- 1993 Plenary Address for the European Symposium on Biocatalysis, Graz, Austria.

### **Editorial Activities**

Associate Editor, *Biotechnology and Bioengineering* (1995-present)  
 Associate Editor for *Biocatalysis* (1992-1995)  
 Editor, Patents and Literature, *Applied Biochemistry and Biotechnology* (1989-1993).  
 Serving on the Following Editorial Boards: *Enzyme and Microbial Technology*, *Applied Biochemistry and Biotechnology*, *Biocatalysis and Biotransformations*, *Metabolic Engineering*

### **Professional Activities**

Board Member for Capital Region Center for Economic Growth, 2017-present  
 Member of the White House-Led Technology Working Group for the Advanced Manufacturing (AMP2.0) Partnership (2013-2014)  
 Member of NIGMS BRT-B Study Section (NIH), 2011-2012 (stepped down upon being named VP for Research)  
 Participant, NIGMS Training Taskforce (NIH), 2011  
 Member, President's Council of Advisors for Science and Technology (PCAST) Working Group on Advanced Manufacturing, 2010  
 NIH College of Reviewers, 2010-2012  
 Member of U.S. Council on Competitiveness Working Committee for Innovation Frontiers, 2004  
 NIH Bioanalytical and Engineering Study Section, 2003  
 Program Chairman, Biotechnology Secretariat, American Chemical Society, Boston, August, 1998  
 Chairman, Enzyme Engineering XIII, Engineering Foundation Conference, San Diego, CA, October, 1995  
 Chairman, Division of Biochemical Technology, American Chemical Society, 1992.  
 Executive Committee, Division of Biochemical Technology, American Chemical Society, 1989-1993.  
 Program Chairman, American Chemical Society, Division of Microbial and Biochemical Technology, National Meeting, Dallas, TX, April, 1989.  
 Program Chairman, American Chemical Society, Division of Biochemical Technology, National Meeting, Washington, D.C., August, 1990.  
 Executive Committee, Midwest Biotechnology Symposia (1989-1992).  
 Executive Committee, Byproducts from Biotechnology Consortium, Iowa City (1989-98).  
 NIH Biotechnology Training Grant Study Section, 1996.  
 Membership in: American Chemical Society, American Institute of Chemical Engineers, American Institute of Medical and Biological Engineers, American Association for the Advancement of Science, National Academy of Innovation.

## Consulting Activities and Scientific Advisory Boards

Consulted for the following companies: Mead Corp., Merck, Kraft General Foods, Enzon, Enzyme Organics, DuPont, Olin Corp., Tate & Lyle Group R & D, Celgene, National Oats, Amoco, Degussa, Procter and Gamble, Genencor International, Syntex, Yukong, Mallinckrodt, Clorox, Neogene, Abbott Laboratories, Hercules, Engelhard Corp., Dow Chemical, A.E. Staley, General Electric, Schenectady International, YCTA, Grace-Davison, Codexis, Diversa, BASF, Biocatalytics, FMC Corp, Rohm & Haas, Wrigley, Bioformix, and Akermin.

Co-founder, RedPin Therapeutics (2018-present)

Co-founder and Director, Solidus Biosciences, Inc. (2002-2016).

Co-founder, The Paper Battery Company (2009-2018).

Co-founder and Director, EnzyMed, Inc. (1994-1999); EnzyMed, Inc. was acquired in 1999 by Albany Molecular Research, Inc.

Member, Scientific Advisory Boards: Acera Biosciences (2002-2007); Bioformix (2012-present); Burrill & Co. Life Science Advisory Board (2006-2012); DNANO (2011-present); Dow Chemical Biotechnology Advisory Board (1998-2003); EnzyMed, Inc. (1994-1999); Enzymol International (1993-1997); Solidus Biosciences, Inc. (2002-2016).

Member, Academic Scientific Advisory Boards: Singapore University of Technology and Design (2011-2015); IIT-Bombay (2015-present).

### Patents and Patent Applications

1. A. M. Klivanov and J. S. Dordick (1989). "Enzymatic Temperature Change Indicator", U.S. Patent 4,826,762.
2. E.B. Rathbone, K.S. Mufti, R.A. Khan, P.S.J. Cheetham, A.J. Hacking, and J.S. Dordick (1989). "Tetrachlororaffinose and its Use in the Preparation of Sucralose", U.S. Patent 4,826,962; Great Britain Patent 2,181,734; Canadian Patent 1,282,728.
3. J.S. Dordick, A.J. Hacking, and R.A. Khan (1992). "Selective Acylation of Sugars", U.S. Patent 5,128,248; Great Britain Patent 2,224,733; Japanese Patent 2,758,941.
4. S. Bornemann, J.M. Cassells, C.L. Combes, J.S. Dordick, and A.J. Hacking (1992). "Preparation of Acylated Sucrose Derivatives", U.S. Patent 5,141,860.
5. J. S. Dordick, D. G. Rethwisch, and D. R. Patil (1993). "Sugar-Based Polymers", U. S. Patent 5,270,421.
6. J. S. Dordick, A. J. Hacking, and R.A. Khan (1993). "Sucrose 6,4'-Dicarboxylic Esters", U. S. Patent 5,270,460.
7. J. S. Dordick, Y. L. Khmel'nitsky, and D. S. Clark (1995). "Reacting an Enzyme in a Non-Aqueous Solvent by Adding a Lyophilizate of Enzyme and Salt to the Solvent", U. S. Patent 5,449,613.
8. J. S. Dordick, B.D. Martin, and R.J. Linhardt (1995). "Method of Making Poly(Sugar Acrylates) Using Hydrolytic Enzymes", U. S. Patent 5,474,915.
9. J. S. Dordick, D. G. Rethwisch, and D. R. Patil (1997), "Sugar-Based Polymers", U. S. Patent 5,618,933.
10. J. S. Dordick and V. M. Paradkar (1998). "Enzyme-Surfactant Ion-Pair Complex Catalyzed Reactions in Organic Solvents ", U. S. Patent 5,719,039.
11. J. S. Dordick, R. J. Linhardt, and B. D. Martin (1998). "Sugar-Based Hydrogels", U.S. Patent 5,854,030.
12. J. S. Dordick, D. G. Rethwisch, and D. R. Patil (1998), "Sugar-Based Polymers", Canadian Patent 2,088,366.
13. J. S. Dordick, P. Wang, M. V. Sergeeva, and S. J. Novick (1999). "Biocatalytic Plastics", U. S. Patent 5,914,367.
14. J.A. Akkara, D.L. Kaplan, F.F. Bruno, and J.S. Dordick (2000), "Transesterification of Insoluble Polysaccharides", U. S. Patent 6,063,916.
15. J.S. Dordick, D.S. Clark, P.C. Michels, and Y.L. Khmel'nitsky (2000), "Biocatalytic methods for synthesizing and identifying biologically active compounds", U.S. Patent 6,136,961.

16. J.S. Dordick, V. M. Paradkar, and M.V. Sergeeva (2001), "Enzyme catalysis in organic solutions containing water", U.S. Patent 6,171,813.
17. J.A. Akkara, D.L. Kaplan, F.F. Bruno, and J.S. Dordick (2001), "Transesterification of Insoluble Polysaccharides", U.S. Patent 6,228,997.
18. J.S. Dordick, D.S. Clark, P.C. Michels, and Y.L. Khmelnitsky (2002), "Taxol derivatives", U.S. Patent 6,465,625.
19. J.S. Dordick, P. Wang, M.V. Sergeeva, and S.J. Novick (2001), "Polymer-protein composites and methods for their purification and use", U.S. Patent 6,291,582.
20. M. A. Markowitz, P. E. Schoen, B. P. Gaber, B. R. Ratna, P. R. Kust, D. C. Turner, D. S. Clark, and J. S. Dordick (2001), "Molecularly-Imprinted Material Made by Template-Directed Synthesis", U. S. Patent 6,310,110.
21. Y.L. Khmelnitsky, C.L. Budde, J.M. Arnold, J.O. Rich, S.S. Chen, A.Y. Usyatinsky, D.S. Clark, and J.S. Dordick (2001), "Two-step enzymatic acylation", U.S. Patent 6,261,813.
22. J. S. Dordick, J. Kim, and X. Wu (2002), "Sensing Array and Sensor Structure", U. S. Patent 6,406,668.
23. M. A. Markowitz, P. E. Schoen, B. P. Gaber, B. R. Ratna, P. R. Kust, D. C. Turner, D. S. Clark, and J. S. Dordick (2003), "Molecularly-Imprinted Material Made by Template-Directed Synthesis", U. S. Patent 6,583,191.
24. M. A. Markowitz, P. E. Schoen, B. P. Gaber, B. R. Ratna, P. R. Kust, D. C. Turner, D. S. Clark, and J. S. Dordick (2003), "Molecularly-Imprinted Material Made by Template-Directed Synthesis", U. S. Patent 6,660,780.
25. M. A. Markowitz, P. E. Schoen, B. P. Gaber, B. R. Ratna, P. R. Kust, D. C. Turner, D. S. Clark, and J. S. Dordick (2004), "Molecularly-Imprinted Material Made by Template-Directed Synthesis", U. S. Patent 6,713,416.
26. M. A. Markowitz, P. E. Schoen, B. P. Gaber, B. R. Ratna, P. R. Kust, D. C. Turner, D. S. Clark, and J. S. Dordick (2003), "Molecularly-Imprinted Material Made by Template-Directed Synthesis", U. S. Patent 6,660,780.
27. S.M. Cramer, K. Rege, and J.S. Dordick (2005), "High-throughput screening of potential displacer molecules", U.S. Patent 6,881,540.
28. J.S. Dordick and D.S. Clark (2007), "Biocatalytic Sol-Gel Microarrays", U.S. Patent 7,267,958.
29. J.S. Dordick, L. Santhanam, M. Hogg, and J.A. Holland (2007), "Solid-Phase Array-Based Biocatalytic Transformations", U.S. Patent 7,202,030.
30. J.S. Dordick, M.-Y. Lee, A. Srinivasan, and B. Ku (2007), "Enzyme Immobilization for Electroosmotic Flow", U.S. Patent 7,172,682.
31. J.S. Dordick, A. Srinivasan, J. Kim, D. Sherman, and D.S. Clark (2008), "In vitro Metabolic Engineering on Microscale Devices", U.S. Patent 7,427,497.
32. J.S. Dordick and D.S. Clark (2010), "Biocatalytic Sol-Gel Microarrays", U.S. Patent 7,846,747; Canadian Patent 2,466,172; Japanese Patent 4,365,216.
33. K. Rege, S. Hu, J.S. Dordick, and S.M. Cramer (2008), "Aminoglycoside-Polyamine Displacers and Methods of Use in Displacement Chromatography", U.S. Patent 7,439,343.
34. M.Y. Lee, A.K. Ramasubramanian, D.S. Clark, and J.S. Dordick (2012), "Three-Dimensional Cellular Array Chip and Platform for Toxicology Assays, Canadian Patent 2,628,219; Japanese Patent 4,959,710.

35. R.J. Linhardt, J.S. Dordick, T.J. Simmons, M. Miyauchi, and S.H. Lee (2014), “Synthetic Wood Composite”, U.S. Patent 8,772,406.
36. Z. Wang, R.J. Linhardt, J.S. Dordick, and U. Bhaskar (2014), “K5 Heparosan Fermentation and Purification”, U.S. Patent 8,883,452.
37. S.A. Stanley, J.M. Friedman, J.S. Dordick, and J. Sauer (2014), “Compositions and Methods to Modulate Cell Activity”, U.S. Patent Application 201462053602.
38. M. Miyauchi, J. Miao, T.J. Simmons, J.W. Lee, T.V. Doherty, J.S. Dordick, and R.J. Linhardt (2015), “Cellulose Sheathed Nanotube Fiber,” U.S. Patent 9,061,904.
39. J.S. Dordick, R.S. Kane, P. Asuri, S.S. Karajanagi, A.A. Vertegel, and R.W. Siegel (2016), “Enhanced Stability of Proteins Immobilized on Nanoparticles,” U.S. Patent 9,360,475.
40. X. Qian, J.E. Gagner, J.S. Dordick, and R.W. Siegel (2016), “Internalization of Proteins into Hollowed Gold Nanostructures,” U.S. Patent 9,562,225.
41. L. Fu et al. (2018), “Biosynthetic Heparin, PCT/US17/5038.
42. L. Fu et al. (2018), “Enzymatic Preparation of Anticoagulant Bovine Sourced Heparin”, PCT Application.
43. S.J. Kwon et al. (2018), “Conjugate Including Core and Sialic Acid or Derivative Thereof Bound to Surface of Core and Use Thereof”, PCT Application.
44. S.J. Kwon, I.S. Lee, J.B. Kim, and J.S. Dordick (2019), “Multiplex Detection of Bacterial Pathogens via Enzyme-Linked Cell Wall Binding Domain (CBD)-Sorbent Assay”, PCT Application.
45. S.J. Kwon, J.S. Dordick, R.J. Linhardt, M.G. Kim, J. Oh, W.J. Sonstein (2019), “Determination of Cerebrospinal Fluid Leakage by Selective Deletion of Transferrin Glycoform Using an Immunochromatographic Assay”, Provisional Application.

### **Invited Academic Seminars**

- “Breaking Away from Nature’s Boundaries Using Biologically Active Nanocomposites in Medicine and Beyond”, Illinois Institute of Technology, Chicago, IL, September 2019.
- “Convergence of High-Throughput 3D Cell Culture with Artificial Intelligence to Advance Predictive Human Toxicology”, Korea University, Seoul, Korea, December 2018.
- “Remote Control of Cells: From Biomanufacturing to Human Therapeutics”, Carnegie-Mellon University, Pittsburgh, PA, October 2018.
- “Molecular Control of Cellular Systems to Advance Regenerative Medicine”, Instituto Superior Tecnico, Regenerative Medicine Workshop, Lisbon Portugal, July 2017.
- “The Expanding Biomolecular Engineering Toolbox for Advancing Therapeutic Outcomes: From Microscale 3D Cell Culture to Remote Activation of Gene Expression”, Korea University, Seoul, Korea, April 2017.
- “Exploiting the Interface of Biomolecular Engineering and Materials Science to Generate New Therapeutic Outcomes”, IIT-Bombay, Mumbai, India, February 2017.
- Robert Pigford Memorial Lecture:** “Exploiting the Interface of Biomolecular Engineering and Nanotechnology to Generate New Therapeutic Outcomes”, University of Delaware, Newark, DE, October 2016.
- “Exploiting the Interface of Biomolecular Engineering and Nanotechnology to Generate New Therapeutic Outcomes”, Shanghai Jiao Tong University, Shanghai, China, June 2016.

- “Exploiting the Interface of Biomolecular Engineering and Nanotechnology to Generate New Therapeutic Outcomes”, Beijing University of Chemical Technology, Beijing, China, June 2016.
- “Molecular Bioprocessing as an Emerging Paradigm for Advancing Medicine”, Bollum Symposium, University of Minnesota, Minneapolis, MN, May 2016.
- “Molecular Bioprocessing as an Emerging Paradigm for Advancing Medicine”, University of Iowa, Iowa City, IA, October 2015.
- “Biocatalytic Nanocomposites: Engineering Form, Function, and Protection from Disease”, SUNY Binghamton, New York, September 2015.
- “Biocatalytic Nanocomposites: Marrying Biomolecular Science and Advanced Materials to Provide Form, Function, and Protection from Disease”, Department of Chemical Engineering, Arizona State University, Tempe, AZ, November 2012.
- “High-Throughput 3D Cell Cultures for Drug Discovery and Human Toxicology”, Department of Chemical Engineering, Michigan State University, E. Lansing, MI, November 2012.
- “High-Throughput 3D Cell Cultures for Drug Discovery and Human Toxicology”, Polytechnic University, Milan, Italy, July 2012.
- “Enzyme-Based Nanocomposites: Using Nature to Ward off Emerging Diseases”, Department of Chemical and Biomolecular Engineering, University of Colorado, Boulder, CO, December 2011.
- Mylan Lecture:** “Enzyme-Based Nanocomposites: From Topological Stabilization to Self-Decontaminating Surfaces”, Department of Chemical Engineering, University of West Virginia, Morgantown, WV, November 2011.
- “Enzyme-Based Nanocomposites: Using Nature to Ward off Emerging Diseases”, Department of Chemistry, CCNY, New York, NY, November 2011.
- “Enzyme-Based Nanocomposites: From Topological Stabilization to Self-Decontaminating Surfaces”, Department of Chemical Engineering, University of Houston, April 2011.
- Merck Lecture:** “High-Throughput 3D Cell Cultures for Drug Discovery and Human Toxicology”, Department of Chemical Engineering, University of Virginia, Charlottesville, VA, April 2011.
- “Enzyme-Containing Paints and Coatings for Decontaminating Materials”, Polytechnic University of NYU, New York, NY, March 2011.
- “Enzyme-Based Nanocomposites: From Topological Stabilization to Self-Decontaminating Surfaces”, Department of Chemical Engineering, Ohio State University, Columbus, OH, April 2011.
- “Exploiting Molecular Bioprocessing to Overcome Fundamental Bottlenecks in Drug Discovery”, Department of Chemical Engineering, Columbia University, New York, NY, March 2009.
- “Directed Assembly of Functional Biomolecular and Nanoscale Architectures”, California NanoSystems Institute, University of California, Los Angeles, November 2007.
- “Molecular Bioprocessing as a New Paradigm in Drug Discovery”, Institute of Biotechnology, ETH-Zurich, June 2007.
- “Molecular Bioprocessing as a New Paradigm in Drug Discovery”, Department of Chemical and Biomolecular Engineering, Tufts University, Medford, MA January 2007.
- “Molecular Bioprocessing as a New Paradigm in Drug Discovery”, Center for Systems Biology, Georgia Institute of Technology, Atlanta, GA, January 2007.

- “Controlling Protein-Surface Interactions: From Nanoscale Architectures to Drug Discovery Platforms”, Department of Chemical and Biomolecular Engineering, Pennsylvania State University, State College, PA, October 2006.
- “Controlling Protein-Surface Interactions: From Nanoscale Architectures to Drug Discovery Platforms”, Department of Chemical Engineering and Materials Science, University of Minnesota, Minneapolis, MN, October 2006.
- “High-Throughput Biocatalysis for New Compound Discovery”, University of Hawaii-Manoa, Honolulu, HI, February 2006.
- “Enzyme structure and Function in Nonaqueous Media”, Bennington College, Bennington, VT, December 2005.

### **Invited Lectures and Panels**

"Towards a Mechanism for Endogenous Ferritin-Driven Magnetogenetics *in Vitro*", Symposium on Magnetic Activation of Ion Channels, Howard Hughes Medical Institute, Ashburn, VA, March 2019.

Panel member on "Artificial Intelligence and Our World: Where is it going?", Disney Imagineering, Glendale, CA, September 2017.

"Exploiting 3D Cell Cultures for Drug Discovery and Regenerative Medicine", CHI Conference on Screening and Functional Analysis of 3D Models, Cambridge, MA, November 2017.

"Exploring the Unique Niche for Biocatalysis in Chemical and Biological Agent Decontamination", DTRA Tech Talk, McLean, VA, September 2017.

"Exploiting the Interface of Biomolecular Engineering and Materials Science to Generate New Therapeutic Outcomes", Korean Society for Biotechnology & Bioengineering, Gyeong-Ju, Korea, April 2017.

"Pandemics and Big Data: Disrupting Transmissible Diseases", World Economic Forum, Tianjin, China, June 2016.

"Molecular Bioprocessing as an Emerging Paradigm for Advancing Medicine", Plenary Award Talk at the Korean Society for Biotechnology & Bioengineering, Gyeong-Ju, Korea, April 2016.

**Food, Pharmaceutical and Bioengineering Award Address:** "Molecular Bioprocessing as an Emerging Paradigm for Advancing Medicine", AIChE Annual Meeting, Salt Lake City, UT, November 2015.

"Enzymes to the Rescue: Battling Infectious Disease Using Enzyme Technology", Enzyme Engineering XXIII, St. Petersburg, FL, September 2015.

"Biocatalytic Nanocomposites: Engineering Form, Function, and Protection from Disease", Nano Korea, Seoul, Korea, July 2015.

"Exploiting Protein-Based Nanocomposites for Therapeutic Applications", DECHEMA Annual Meeting, Aachen, Germany, October 2014.

"Fostering our Future Healthcare Researchers", Partnering for Cures Conference, New York, NY, November 2013.

"High-Throughput 3D Cell Culture for Drug Discovery and Human Toxicology", CHI 3D Cell Culture Conference, Cambridge, MA, October 2013.

"Biocatalytic Nanocomposites: Engineering Form, Function, and Protection from Disease", Enzyme Engineering XXII, Toyama, Japan, September 2013.

"Pharma's New World: Mimicking the Human Body for Rapid Discovery of Safe and Effective Drugs", Renaissance Weekend, Charleston, SC, December 2012.

"Nanobiocatalysis for Sustainable Bioprocessing", Lipid Resource and Process Technology Symposium, Aarhus, Denmark, October 2012.

"Biocatalytic Nanocomposites: Painting a Brighter Future in Healthcare and Bioprocessing", International Biotechnology Symposium, Daegu, Korea, September 2012.

"Biocatalytic Nanocomposites: Marrying Biomolecular Science and Advanced Materials to Provide Form, Function, and Protection from Disease", Biocat2012, Hamburg, Germany, September 2012.

- “Biocatalytic Nanocomposites: Painting a Brighter Future”, Biocatalysis Gordon Conference, Smithfield, RI, July 2012.
- “Integrating Nature and Nano to Form Safe and Responsive Materials”, World Economic Forum, Davos, Switzerland, January 2012.
- “Enzyme-Based Nanocomposites: Using Nature to Ward off Emerging Diseases”, AIChE Annual Meeting, Minneapolis, MN, October 2011.
- “Functionally Organized Hierarchical Nanobiomaterials”, AIChE Plenary Lecture, Section 22, AIChE Annual Meeting, Salt Lake City, UT, November 2010.
- “The Impact of Molecular Bioprocessing on Realizing the Potential of Functional Nanobiomaterials”, MRS Functionalized Nanobiomaterials for Medical Applications Meeting, Denver, CO, October 2010.
- “High-Throughput 3D Cell Cultures for Drug Discovery and Human Toxicology”, Visiongain Symposium, London, UK, September 2010.
- “Drivers to Our Sustainable Future”, World Economic Forum, Tianjin, China, September 2010.
- “Catalytic Stimulus: Putting Enzymes to Work in Organic Solvents”, Symposium in Honor of Fred Heineken, American Chemical Society, San Francisco, CA, March 2010.
- “Designing and Optimizing Cellular and Biomolecular Processes on High-Throughput Microscale Devices”, EMCC-6 Meeting, Antalya, Turkey, March 2010.
- “Molecular Bioprocessing: High-Throughput Chemical and Cellular Biology on a Chip”, Riken Institute, Wako, Japan, February 2010.
- “Enzyme-Nanomaterial Based Coatings and Paints for Self-Decontaminating Surfaces”, Riken Conference on Soft Materials & Interfaces, Harima, Japan, January 2010.
- “Biocatalysis: A Natural Marriage of Life Science and Nanotechnology”, Nanobiotechnology Meeting, Rensselaer Polytechnic Institute, Troy, NY, October, 2009.
- “High-Throughput Cell- and Enzyme-Based Microarrays for Predictive Human Toxicology”, Biopolis, Singapore, September 2009.
- “Molecular Bioprocessing: Exploiting Nature’s Diversity to Tackle Therapeutic Bottlenecks”, Biochemical Engineering meeting, Burlington, VT, July 2009.
- “Three-Dimensional Human Cellular and Metabolizing Enzyme Microarrays for High-Throughput Toxicity Screening, Society of Toxicology Annual Meeting, Baltimore, MD, March, 2009.
- “Three-Dimensional Cell Culture Microarrays as a High-Throughput Approach to Study Stem Cell Fate”, 4th International Meeting of the Portuguese Society for Stem Cells and Cell Therapy, Lisbon, Portugal, April, 2009.
- “Enzyme Stabilization Promoted on Highly Curved Nanoscale Materials”, Army Research Office Workshop on Enzyme Stabilization, Key West, FL, December 2008.
- “The MetaChip Platform as a High-Throughput Technology for Rapid Assessment of Human Toxicity of Drug Candidates and Environmental Chemicals”, National Toxicology Program on High-Throughput Methods for In Vitro Toxicity Testing, NIEHS, Research Triangle Park, NC, September 2008.
- “Functionally Organized Protein-Nanomaterial Interfaces”, Gordon Research Conference, Aussois, France, September 2008.
- “High-Throughput Molecular Bioprocessing: A New Addition to Biochemical Engineering Science“, **Plenary Address**, European Society for Biochemical Engineering Science, Faro, Portugal, September 2008.

“The MetaChip Platform for High-Throughput CYP450 Inhibition and Cytotoxicity Analysis”, CHI World Congress on Drug Discovery, Philadelphia, PA, May 2008.

“Molecular Bioprocessing for Healthcare Applications”, EMCC5, Calabria, Italy, May 2008.

“High-Throughput Metabolism and Toxicology: A Vision for Tomorrow’s Drug Discovery”, Metabolism and Drug Oxidation Meeting, Saratoga, NY, July 2008.

“A High-Throughput 3D Cell Microarray to Study Stem Cell Fate”, Society of Biological Engineers Stem Cell Conference, San Diego, CA, January 2008.

**Marvin J. Johnson Award Address:** “Molecular Bioprocessing: From Design to Discovery to Dreams”, American Chemical Society Annual Meeting, Boston, MA August 2007.

**Elmer Gaden Award Address:** “Directing the Assembly of Multifunctional Biomolecular Architectures”, American Chemical Society Annual Meeting, Boston, MA August 2007.

“Enzyme-Nanomaterial Conjugates: Opportunities for Functionally Organized Materials”, 12<sup>th</sup> Mexican Biotechnology and Bioengineering Meeting, Morelia, Mexico, June 2007.

“Role of Water on Enzymatic Catalysis in Organic Media”, 12<sup>th</sup> Mexican Biotechnology and Bioengineering Meeting, Morelia, Mexico, June 2007.

“High-Throughput Biocatalysis for Drug Discovery and Development”, AIChE National Meeting Topical Symposium, San Francisco, CA, November 2006.

“High-Throughput Biocatalysis for Drug Discovery and Human Toxicology”, Trends in Organic Chemistry Symposium, Stockholm, Sweden, September 2006.

### **Invited Industrial Seminars and Short-Courses**

- “Microscale 3D Cell Culture Models for Drug Discovery”, Novartis, Basel, Switzerland, May 2014.
- “Predictive Safety Screening”, Novartis, Basel, Switzerland, December 2012.
- “Enzyme-Based Nanocomposites: Using Nature to Ward off Emerging Diseases”, Genencor, Palo Alto, CA, July 2011.
- “Enzyme-Based Paints and Coatings for Self-Cleaning and –Decontaminating Surfaces”, External Speaker for Arch Chemicals Corporate Retreat, Norwalk, CT, March 2011.
- “Enzyme-Based Nanocomposites: A New Opportunity to Exploit Biocatalysis”, Wrigley Co., Chicago, IL, February 2011.
- “Molecular Bioprocessing: From Synthetic Heparin to High-Throughput Cell Culture Platforms”, Merck Research Labs, West Point, PA, November 2010.
- “Establishing a Bioengineered Heparin as a Generic Pharmaceutical”, Sandoz, Kundl, Austria, December 2009.
- “Bioengineered Heparin”, Otsuka Pharmaceuticals, Naruto, Japan, September 2009.
- “The MetaChip: A High-Throughput Biocatalysis and Cell Culture Platform for the Rapid Screening of Chemical, Drug, and Cosmetic Toxicity”, General Electric R&D, Niskayuna, NY, January 2008.
- “The MetaChip: A High-Throughput Biocatalysis and Cell Culture Platform for the Rapid Screening of Metabolic Activation and Toxicity of Chemicals”, BASF, Ludwigshafen, Germany, September 2007.
- “Biologically-Driven Synthesis and Assembly of Functional Nanomaterials”, FMC Corporation, Princeton, NJ, December 2006.
- “High-Throughput Biocatalysis for New Compound Discovery”, Codexis, Redwood City, CA, March 2006.
- “The Green State of Biocatalysis”, Kodak, Rochester, NY, July 2005.
- “High-Throughput Biocatalysis for New Compound Discovery”, Biocatalysis Workshop, University College, London, April 2005.
- “Biomolecular Assemblies for Functional Surfaces”, Ciba Specialty Chemicals, Basel, December 2003.
- “Biocatalysis in the Materials World”, 3M, St. Paul, MN, March 2003.
- “Biocatalysis as a Tool for Drug Discovery”, Diversa Corp., San Diego, CA, October 2002.
- “Biotechnology at the Micro- and Nanoscales”, BASF, Ludwigshafen, Germany, August 2002.
- “Engineering a Biology-Materials Interface”, GE Silicones, Waterford, NY, May 2002.
- “Enzyme Technology for a Materials Company”, Short-Course on industrial biotechnology given to W.R. Grace (Davison Division), Columbia, MD, April 2001.
- “Biocatalytic Materials: Opportunities for New Catalytically Active Systems”, Toray, Kyoto, Japan, July 2001.
- “Biocatalytic Opportunities in Agrochemicals”, Calgene, Inc., Davis, CA, April 1999.
- “Enzyme Technology”, Short Course for Hercules, Inc., Barnaveld, The Netherlands, October, 1998.
- “Enzymatically-Derived Sugar Based Polymers”, SCA, Gothenburg, Sweden, October, 1998.
- “Enzyme Technology for the Chemical Industry”, Dow Chemical Co., Midland, MI, June, 1998.
- “Enzyme Technology”, Short Course for Engelhard Corp., Iselin, NJ, June, 1997.

- “Industrial Enzymology”, Short Course for Hercules, Inc. Wilmington, DE, June, 1997.
- “Combinatorial Biocatalysis for Drug Discovery”, Ciba-Geigy, Basel, Switzerland, October, 1996.
- “Enzymatic Catalysis for the Pharmaceutical Industry”, Abbott Laboratories, North Chicago, IL, June, 1996.
- “Biocatalysis for the Petroleum Industry”, British Petroleum Chemicals, London, England, June, 1996.
- “Enzymatic Catalysis for Bulk and Fine Chemicals Production”, Hercules, Wilmington, DE, April, 1996.
- “Enzymes Masquerading as Chemical Catalysts: The Properties and Potentials of Enzyme Technology”, Dow Chemical Company, Midland, MI, April, 1996.
- “Modern Methods of Influencing Enzyme Structure and Function”, Lonza, Ltd., Visp, Switzerland, September, 1994.
- “Unusual Catalytic Properties of Peroxidases”, Clorox, Co., Pleasanton, CA, September, 1993.
- “Enzyme Technology Short Course”, Mallinckrodt Chemicals, St. Louis, April, 1993.
- “Enzymatic Catalysis in Organic Solvents”, Lonza, Ltd., Visp, Switzerland, February, 1993.
- “Potential of Nonaqueous Enzymology for the Pharmaceutical Industry”, Hoffmann-La Roche, Basel, February, 1993.
- “Enzymes in Industrial Biotechnology”, Sumitomo Corp., Takarazuka, Japan, September, 1992.
- “Peroxidases and Their Commercial Opportunities”, Novo Nordisk, Bagsvaerd, Denmark, April, 1992.
- “Enzymes for the Synthesis of Specialty Chemicals”, Yukong Ltd, Fairfield, NJ, November, 1991.
- Short-Course entitled “Enzymes for Novel Food Applications”, Kraft General Foods, Tarrytown, NY, May, 1991.
- “Biocatalysis and Biorecognition in Nonaqueous Systems for Reaction and Separation”, Olin Chemical, Cheshire, CT, May, 1991.
- “Enzymatic Catalysis in Organic Media”, Enzon, Inc., South Plainfield, NJ, April, 1991.
- “Chemoenzymatic Approaches to Organic and Polymer Syntheses”, Allied-Signal, Des Plaines, IL, January, 1991.
- “Protein Design for Organic Media”, Procter and Gamble, Co., Cincinnati, OH, February, 1990.
- “Potential of Enzymes as Catalysts for Biodegradable Polymer Synthesis”, E. I. Du Pont De Nemours & Co., Wilmington, DE, June, 1989.
- “Alterations in Enzymic Substrate Specificity in Organic Solvents”, Genencor, Inc., South San Francisco, CA, April, 1989.
- “Peroxidases in Coal Liquefaction”, Amoco Oil Co., Naperville, IL, January, 1989.
- “Peroxidase Catalysis in Organic Media”, Mead Corp., Chillicothe, OH, October, 1988.

#### **Ph.D. Students and Postdocs**

Total number of Ph.D. students graduated = 58

Total number of postdocs and visiting scientists supervised = 90
